No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1994 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

This journal is printed on acid-free paper.

Contents of Volume 153

NUMBER 1, JANUARY 1994

SABURO SAITO, MARTIN E. DORF, NAOHIRO WATANABE, AND TAKUSHI TADAKUMA. Preferential Induction of IL-4 Is Determined by the Type and Duration of Antigenic Stimulation 1

WENDY C. BROWN, WILLIAM C. DAVIS, SANG H. CHOI, DIRK A. E. DOBBELAERE, AND GARY A. SPLITTER. Functional and Phenotypic Characterization of $WC1^+\gamma/\delta$ T Cells Isolated from *Babesia bovis*-Stimulated T Cell Lines 9

P. BARJA, A. ALAVI-NASSAB, C. W. TURCK, AND J. FREIRE-MOAR. Inhibition of T Cell Activation by Protein Kinase C Pseudosubstrates 28

FRANCESCA CHIAFFARINO, MAURO BIFFI, ANNA LUCIANO, GIANNI GROMO, AND FLAVIO LEONI. Involvement of Multiple Protein Kinases in CD3-Mediated Activation of Human T Lymphocytes 39

KAZUO OHTSUKA, TSUNEO IIAI, HISAMI WATANABE, TOSHIYUKI TANAKA, MASAYUKI MIYASAKA, KAZUNARI SATO, HITOSHI ASAKURA, AND TORU ABO. Similarities and Differences between Extrathymic T Cells Residing in Mouse Liver and Intestine 52

CARMEN FERNANDEZ AND EVA SVERREMARK. Immune Responses to Bacterial Polysaccharides: Terminal Epitopes Are More Immunogenic Than Internal Structures 67

HIROYUKI KENAI, YASUNOBU YOSHIKAI, GORO MATSUZAKI, AKINORI IWASAKI, HIROYUKI YUUKI, TAKAO NAKAMURA, AND KIKUO NOMOTO. Appearance of Extrathymic Early Differentiated $CD4^-CD8^-$ T Cells with T Cell Receptor γ/δ or α/β after Thymus Grafting to Nude Mice: Influence of Thymus on Extrathymic T Cell Differentiation 79

BENJAMIN S. WEEKS, EVA HOLLOWAY, PAUL E. KLOTMAN, STEVEN K. AKIYAMA, H. WILLIAM SCHNAPER, AND HYNDA K. KLEINMAN. 12-*O*-Tetradecanoylphorbol 13-Acetate Stimulates Human T-Lymphocyte Adherence to the Fibronectin RGD Domain and the Laminin IKVAV Domain 94

KOICHI KUWANO, SAORI ONO, AND SUMIO ARAI. Immobilized Anti-TCR mAb Induces Split Functions in a $CD8^+$ CTL Clone 105

LINDA B. LUDWIG, STANLEY A. SCHWARTZ, AND RICHARD A. INSEL. Human Monoclonal λ Light Chain Protein Exhibits Specific Binding to the Variable Region of Monoclonal Anti-IgE Antibody 117

MARIANNE URBANSKI AND ROBERT E. CONE. T Cell-Derived Antigen-Specific Humoral Immune Response. II. Further Characterization of the Response and the Antigen Binding T Cell Immunoproteins 131

LILIANA JASO-FRIEDMANN, JOHN H. LEARY III, AND DONALD L. EVANS. Pathways of Signaling in Nonspecific Cytotoxic Cells: Effects of Protein Kinase and Phosphatase Inhibitors and Evidence for Membrane Tyrosine Phosphorylation 142

MOHAMED G. ELFAKI, NANCY L. O'SULLIVAN, CHERYL A. SKANDERA, AND PAUL C. MONTGOMERY. Inhibition of Lymphocyte Adherence to Rat Lacrimal Acinar Epithelium by Interleukin-4 and Transforming Growth Factor-β 154

SOJI F. OLUWOLE, NEPAL C. CHOWDHURY, AND MING-XING JIN. The Relative Contribution of Intrathymic Inoculation of Donor Leukocyte Subpopulations in the Induction of Specific Tolerance 163

LAURIE E. LAMBERT AND JENNIFER S. BERLING. Structural Requirements for Recognition of a Type II Collagen Peptide by Murine T Cell Hybridomas 171

SHIN-ICHI SUMIMOTO, TSUYOSHI ISHIGAMI, YUJI HORIGUCHI, SHIN YONEHARA, SHU-ICHI KANAZASHI, TOSHIO HEIKE, KENJI KATAMURA, AND MITSUFUMI MAYUMI. Anti-Fas Antibody Induces Different Types of Cell Death in the Human Histiocytic Cell Line, U937, and the Human B Cell Line, B104: The Role of Single-Strand DNA Breaks and Poly (ADP-Ribosyl)ation in Cell Death 184

CARLO AGOSTINI, RENATO ZAMBELLO, LIVIO TRENTIN, ANDREA CERUTTI, PIETRO BULIAN, CARLO CRIVELLARO, ANGIOLO CIPRIANI, AND GIANPIETRO SEMENZATO. $\gamma\delta$ T Cell Receptor Subsets in the Lung of Patients with HIV-1 Infection 194

BERNADETTE KALMAN, ROBERT L. KNOBLER, AND FRED D. LUBLIN. Preferential but Not Exclusive T Cell Receptor $V\beta$ Chain Utilization of Myelin Basic Protein and Peptide-Specific T Cell Clones in Mice 206

U. LENDECKEL, TH. WEX, TH. KÄHNE, K. FRANK, D. REINHOLD, AND S. ANSORGE. Expression of the Aminopeptidase N (CD13) Gene in the Human T Cell Lines HuT78 and H9 214

41 721HI XL 1129
8/94 31249-300

DIETER DENNIG AND RICHARD J. O'REILLY. IL-7 Induces Surface Expression of B7/BB1 on Pre-B Cells and an Associated Increase in Their Costimulatory Effects on T Cell Proliferation 227

ELISABETTA BLASI, MANUELA PULITI, LUCIA PITZURRA, ANDREA BARTOLI, AND FRANCESCO BISTONI. Heterogeneous Secretory Response of Phagocytes from Different Anatomical Districts to the Dimorphic Fungus *Candida albicans* 239

SHORT COMMUNICATIONS

NEIL M. AMPEL. *In Vitro* Production of Tumor Necrosis Factor-α by Adherent Human Peripheral Blood Mononuclear Cells Incubated with Killed Coccidioidal Arthroconidia and Spherules 248

E. F. POTWOROWSKI, C. CHAMBERLAND, C. BEAUCHEMIN, AND N. MARCEAU. Up-Regulation of a Thymic Epithelial Ligand after Contact with Thymocytes 256

MOTOKO NISHIMURA, SHIGEKI MITSUNAGA, TATSUYA AKAZA, YOSHITADA MITOMI, KENJI TADOKORO, AND TAKEO JUJI. Alloreactive Feature of HLA-DP-Specific Cytotoxic T-Cell Clone 262

ERRATUM

Volume 151, Number 2, 1993: Mark K. Haynes, Laird G. Jackson, Rocky S. Tuan, Kenneth J. Shepley, and J. Bruce Smith, "Cytokine Production in First Trimester Chorionic Villi: Detection of mRNAs and Protein Products *in Situ*," pp. 300–308 271

ANNOUNCEMENTS 272

PAPERS TO APPEAR IN FORTHCOMING ISSUES 274

NUMBER 2, FEBRUARY 1994

KEIKO MAEDA-YOSHIMOTO, TAKAO HIRANO, HIROAKI MIYAJIMA, TAKATOSHI NAGATE, KAZUNORI HANADA, SHUN-ICHI HIROSE, KO OKUMURA, AND ZOLTAN OVARY. Suppression of IgE Production in Unseparated Spleen Cell Cultures 277

SCOTT D. SOMERS AND KENT L. ERICKSON. Alteration of Tumor Necrosis Factor-α Production by Macrophages from Mice Fed Diets High in Eicosapentaenoic and Docosahexaenoic Fatty Acids 287

GORDON D. POWERS, DENISE A. FAHERTY, SUZANNE E. CONNAUGHTON, DENISE A. BIONDI, DALE I. GODFREY, ANDREA GAULT, CHAO-YUAN CHEN, AND NASRIN NABAVI. Expression and Functional Analysis of Murine B7 Delineated by a Novel Monoclonal Antibody 298

MARK D. MANNIE, JANICE MORRISON-PLUMMER, BETSAIDA TORRES-GARCIA, CHRISTINE HANNAWAY, CAROLYN JONES, AND A. MASON SMITH. Parallel Costimulatory Pathways Promote Myelin Basic Protein-Stimulated Proliferation of Encephalitogenic Rat T Cells 312

CARL E. MACKEWICZ, HENRY ORTEGA, AND JAY A. LEVY. Effect of Cytokines on HIV Replication in $CD4^+$ Lymphocytes: Lack of Identity with the $CD8^+$ Cell Antiviral Factor 329

SANDRA M. HAYES, LEONARD D. SHULTZ, AND DALE L. GREINER. Localization of Prothymocytes from Wild-Type and Viable Motheaten Mice Following Intravenous Injection into Irradiated Adoptive Recipients 344

NASHWA S. ABED, JACQUELINE H. CHACE, AUDREY L. FLEMING, AND JOHN S. COWDERY. Interferon-γ Regulation of B Lymphocyte Differentiation: Activation of B Cells Is a Prerequisite for IFN-γ-Mediated Inhibition of B Cell Differentiation 356

MICHEL P. MOUTSCHEN, HUA SHAN, BRUCE J. GIANTONIO, AND MICHAEL A. BOOKMAN. Precursor CTL Specific for Retrovirus-Induced T Lymphoma Are Found at High Frequency in Unprimed Syngeneic Mice 367

SHO MATSUSHITA AND DAVID H. KATZ. Identification of a T Cell Membrane Protein Possibly Involved in IL-4-Induced B Cell Immunoglobulin Class Switching to IgE 378

WILLIAM J. MORRISON, HALINA OFFNER, AND ARTHUR A. VANDENBARK. Enhanced T-Helper Cell Function Following CD4 Modulation 392

HIROYUKI HIRAHARA, MITSURU OGAWA, MOTOHIKO KIMURA, TSUNEO IIAI, MASANORI TSUCHIDA, HARUO HANAWA, HISAMI WATANABE, AND TORU ABO. Glucocorticoid Independence of Acute Thymic Involution Induced by Lymphotoxin and Estrogen 401

TSUNEO IIAI, HISAMI WATANABE, TAKASHI IWAMOTO, IZUMI NAKASHIMA, AND TORU ABO. Predominant Activation of Extrathymic T Cells during Melanoma Development of Metallothionein/*ret* Transgenic Mice 412

STUART MARSHALL-CLARKE AND MARK GREENWOOD. Monoclonal Antibody, LR-2, Recognizes an Immunoglobulin-Linked Signaling Molecule on Murine B Cells 428
KHADIR RADDASSI, BRIGITTE BERTHON, JEAN-FRANÇOIS PETIT, AND GENEVIÈVE LEMAIRE. Role of Calcium in the Activation of Mouse Peritoneal Macrophages: Induction of NO Synthase by Calcium Ionophores and Thapsigargin 443
THOMAS B. SNEED, DEBORAH J. STANLEY, LANNE A. YOUNG, AND RALPH D. SANDERSON. Interleukin-6 Regulates Expression of the Syndecan-1 Proteoglycan on B Lymphoid Cells 456
YOH MATSUMOTO, MASANORI TSUCHIDA, HARUO HANAWA, AND TORU ABO. T Cell Receptor Peptide Therapy for Autoimmune Encephalomyelitis: Stronger Immunization Is Necessary for Effective Vaccination 468
JULIE M. TEBO AND THOMAS A. HAMILTON. Okadaic Acid Stimulates Inflammatory Cytokine Gene Transcription in Murine Peritoneal Macrophages 479
HELEN BRALEY-MULLEN, ROBERT W. MCMURRAY, GORDON C. SHARP, AND MICHAEL KYRIAKOS. Regulation of the Induction and Resolution of Granulomatous Experimental Autoimmune Thyroiditis in Mice by $CD8^+$ T Cells 492
CHRISTIAN BECKER, ABDO KONUR, ANDRÉ RADEMAEKERS, VITAM KODELJA, ANDREA PARTENHEIMER, HANS-GERD PAUELS, AND ECKEHART KÖLSCH. T Helper Target Cell DNA Fragmentation through a CD4-Positive T Suppressor Cell Clone Inducing Specific Unresponsiveness 505
NORIKAZU NAGATA, SHIGERU TAKETANI, TAKUMA NAKAGAWA, NAOKI HOSAKA, HIROKO HISHA, RIKIO TOKUNAGA, AND SUSUMU IKEHARA. Increased Cell Surface Expression of a Newly Identified Heterodimer on Activated Blastic T Cells 516

SHORT COMMUNICATION

STEPHEN H. GREGORY, ATHANASIA J. SAGNIMENI, AND EDWARD J. WING. Arginine Analogues Suppress Antigen-Specific and -Nonspecific T Lymphocyte Proliferation 527

AUTHOR INDEX FOR VOLUME 153 537

NOTICE

The Subject Index for Volume 153 will appear in the December 1994 issue as part of a cumulative index for the year 1994.

INFORMATION FOR AUTHORS

Cellular Immunology will provide an international medium devoted exclusively to publication of original investigations concerned with the immunological activities of cells in experimental or clinical situations. The scope of the journal will encompass the broad area of *in vitro* and *in vivo* studies of cellular immune responses. These include, for example, delayed type hypersensitivity or cellular immunity; immunologic surveillance and tumor immunity; transplantation immunology; autoimmunity, resistance to intracellular microbial and viral infection; immunologic deficiency states and their reconstitution; antigen receptor sites; thymus and lymphocyte immunobiology, etc. The chief criteria for acceptance of papers submitted for publication are the originality, clarity, and quality of the work reported. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Cellular Immunology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All manuscripts should be submitted to the Editor: Dr. H. Sherwood Lawrence, Infectious Disease and Immunology Division, Department of Medicine, New York University Medical Center, 550 First Avenue, New York, New York 10016.

Form. Manuscripts should be typewritten and double-spaced throughout (including tables, footnotes, references, and figure captions); the original typescript should be prepared on one side of a good grade of 8½ × 11-inch white paper, with 1-inch margins on all sides. Mimeographed or duplicated manuscripts will be accepted *if they are indistinguishable from good typed copies.* Submit three complete copies in order to expedite processing of the manuscript. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s), and affiliation(s); at the bottom of the page type a short running head title not exceeding 45 characters (including spaces), and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods after abbreviations of measure (cm, sec, kg, etc.) in text or in tables, except for "in." (inch). Use the American Chemical Society *Style Guide,* 1986, as a reference.

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number equations consecutively, with the number placed in brackets to the extreme right of the equation. Refer to equations as Eq. [3] or simply [3], except at the beginning of a sentence, when the word Equation should be spelled out. Punctuate equations to conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use superscript Arabic numbers [1,2], etc. in the text citations and in the list.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered [a,b], etc. at the end of the table.

Figures. Number figures consecutively in the text with Arabic numerals. Type legends double-spaced together on a separate sheet. Original illustrations no larger than 8½ × 11 inches are preferred. All illustrations should be in finished form suitable for reproduction. They should be planned to fit the proportion of the printed page (5 × 8 in.). Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graphs should be plotted with black India ink on light blue or white coordinate paper with coordinates properly labeled; grid lines that are to show should be inked in black. Photographs should be submitted as glossy prints (5 × 7 or 8 × 10 inches) and not marred by staples, paper clips, or pencil marks. Groupings of photographs should be indicated; if mounting is necessary, use 10- to 12-point *flexible* board.

Illustrations in color can be accepted only if the authors defray the cost.

References. These should be cited in the text by a number in parentheses and listed at the end of the paper in numerical order. Note the following style for book and journal citations:

1. Leopardi, E., and Rosenau, W., *Cell. Immunol.* **83,** 73, 1984.
2. Buckley, R. H., *In* "Monoclonal Antibodies: Probes for the Study of Autoimmunity and Immunodeficiency" (B. F. Haynes and G. S. Eisenbarth, Eds.), pp. 83–95. Academic Press, Orlando, FL, 1983.
3. Katz, D. H., "Lymphocyte Differentiation, Recognition, and Regulation." Academic Press, New York, 1977.

Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index,* 1985. Unpublished observations and personal communications should be cited in the text as such, and should not be included in the reference list.

Letters to the Editor relating to articles appearing in *Cellular Immunology* are welcome and will be published, if found suitable, as limited space permits. All letters must be typewritten in the format of other material submitted for publication and limited in length to two typewritten pages.

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints will be supplied free of charge. Additional reprints can be ordered on the form accompanying the proof.

Personal computer disks. Manuscripts may be submitted to *Cellular Immunology* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
